Product Image

Description

BSB-03P is a precision tungsten carbide blade with a 0.4mm thickness and a 45 degree angle point, designed for extra hardness.

Ideal for use in precision knives, primarily intended use in factory cutting machines due to its durability.

Tungsten Carbide Blades are produced through the process of fusing tungsten powder and carbide powder at high temperature and pressure.

Blade Specification

- Blade Length: 14mm
- Blade Width: 0.4mm
- Blade Thickness: 0.40mm
- Blade angle: 45 Degree
- Blade Material: Tungsten Carbide
- Blade Hardness Measured at: 1600/Hv.

Pack contains 1 blade

Fits NT Cutter Models: D-300P, D-400, D-400P, D-401P, eD-400, D-400GP, D-500GP, DS-800P, D-1000P, C-400P, C-700GP, C-1500P, eC-1500P, iC-1500P
